Summary

Software Engineer with 5+ years of experience developing scalable, high-performance web applications. Strong background in PHP (Symfony, Laravel), AWS infrastructure, database design and optimization (MySQL, NoSQL). Experienced in turning complex business requirements into maintainable, efficient solutions. Driven by clean architecture, performance, and collaborative development.

Experience

QuikTrak (TKS Group) | USA Nov 2023 - Current
Principal Backend Engineer (Full time - Remote - US, Oregon)

Responsibilities
- Led backend development team, upgrated backend infrastructure, developed microservices, and refactored code for scalability.
- Designed and maintained structured services, deployed and operated on AWS (ClaudWatch, DynamoDB, S3).
- Improved CI/CD with Jenkins, optimized MySQL/MongoDB performance.
- Mentored, enforced code standards, and drove system scalability.

Project
- Checks (Full Stack, BE-heavy) – Tech (Symfony 5.2, Laravel 11, PHP 7.4, Docker, MySQL, MongoDB, Jenkins, AWS).

Hinto Group | Italy Feb 2022 - Nov 2023
Backend Engineer (Full time - Remote - Milan)

Responsibilities
- Developed and maintained RESTful APIs using Symfony and Laravel, ensuring reliable backend services and smooth front-end integration.
- Designed backend architectures including multi-tenancy configurations, database optimization, and third-party system integrations.
- Improved CRM performance and data accuracy while supporting scalable, maintainable solutions.

Project
- Santa Rosa (Back-end): Enhanced CRM data accuracy and user experience using Symfony 6.2, Swagger, Docker, and MySQL.
- Covision (Back-end): Integrated dispatch events via SOAP requests in the Abbrevia Adapter and resolved a critical production bug (Laravel 7.2).
- NHOA (Back-end): Built a Golang microservice to track EBS auto-increase events using DynamoDB, Kubernetes, and Prometheus alerts (Go 1.21.6).

We Web | Albania Nov 2020 - Feb 2022
 Full Stack Developer (Full time - Tirana)

Responsibilities
- Designed and implemented internal and client-facing solutions using PHP and SQL Server.
- Built and optimized MVC applications with secure business logic, database integrations, and RESTful services.
- Developed advanced features including search, pagination, exports, and dynamic UI interactions.

Projects
- Contratti: Modernized CRM backoffice with improved performance (Laravel 7, Vue 2, Docker, MySQL).
- SMS-Sender: Independently built an SMS platform end-to-end (Laravel 8, Vuexy, jQuery, Docker)..

Skills

Languages / Frameworks
 PHP, Symfony, Laravel, Go, Livewire, JavaScript, AngularJS, Vue.js
Databases
 MySQL, SQL Server, DynamoDB, NoSQL Databases
Cloud / DevOps & Tools
 AWS, Docker, Jenkins, REST APIs, Swagger, Git, Unit Testing, Shopware 6

Languages

Albanian
English

Education

Polytechnic University of Tirana
BSc Software Engineering

Polytechnic University of Tirana
MSc Software Engineering

Achievments

Junction Hackathon winner
2023 Hackathon winner With over 500+ other developers around Balkan I took the 1st place and won the main price which also gave me the opportunity to participate in one of the biggest hackathons in Europe (Junction Finland) .
